

## Sculptra® Aesthetic is different in the way that it works.

### Provides gradual results that can last up to two years\*

Sculptra Aesthetic is a facial injectable that works gradually in a series of treatments — on average, three injection sessions over a few months — for a subtle, more youthful looking appearance. Welcome to the new age of anti-age.

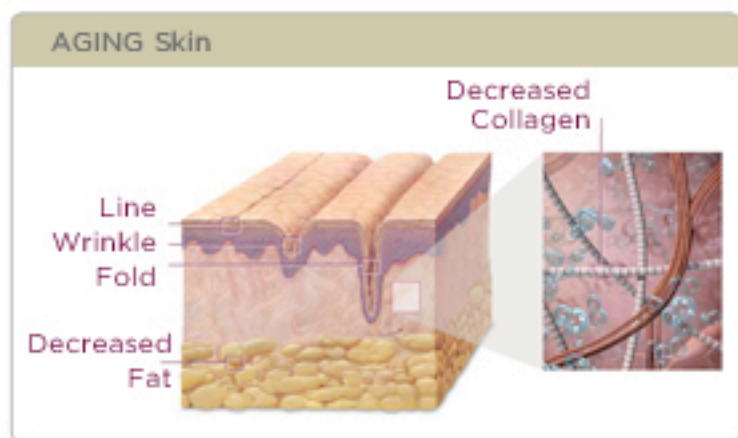

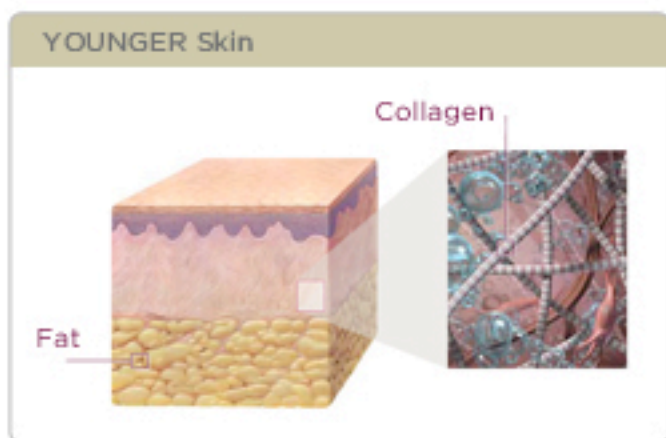

### Goes to the source of facial aging

Sculptra Aesthetic targets the underlying causes of the signs of facial aging. It can give you noticeable results that emerge subtly and can last for up to two years.\* It begins to work within the deep dermis, where your skin's structure is reinforced as Sculptra Aesthetic helps to **replace lost collagen**. This reinforced collagen structure provides a foundation that gradually **restores the look** of fullness of your shallow to deep facial wrinkles and folds that have depleted over time. The result? Sculptra Aesthetic is different because it gradually and subtly corrects these facial wrinkles and folds. This can provide a **refined**, more youthful looking appearance that can last up to two years.\*

### Is biocompatible and biodegradable

Sculptra Aesthetic is made from a synthetic material called poly-L-lactic acid, which is gradually and naturally absorbed by the body as it works to replace lost collagen. Poly-L-lactic acid has been used safely for decades in dissolvable stitches and since 1999 as a facial injectable in over 30 countries.

You should not use Sculptra Aesthetic if you are allergic to any ingredient of the product or have a history of keloid formation or hypertrophic scarring.

\*Individual results and treatment sessions may vary.

## About Sculptra® Aesthetic

**Age doesn't have to look the way it used to. It's more subtle.  
More gradual. Shouldn't your anti-age be just as subtle?**

Introducing Sculptra® Aesthetic (injectable poly-L-lactic acid). Not an overnight miracle. Long lasting. Not a quick fix. The first facial injectable that gives you subtle results over time. Replacing lost collagen. Giving you a more natural-looking appearance, without giving you away. A full treatment of Sculptra Aesthetic, an average of 3 injection sessions over a few months, can last up to 2 years. Individual results and treatment sessions may vary. So you have more time to see how sensational subtle can be. Welcome to the new age of anti-age.

Sculptra Aesthetic is a new type of facial injectable made from poly-L-lactic acid, (a synthetic material that has been used safely for decades in resorbable stitches and as an injectable since 1999 in over 30 countries. It is biocompatible and biodegradable. Poly-L-lactic acid is the main ingredient in Sculptra Aesthetic.) which helps to replace lost collagen. It helps correct shallow to deep facial wrinkles and folds that appear with aging by replacing lost collagen. Safety and effectiveness of Sculptra Aesthetic have not been evaluated in areas other than nasolabial wrinkles and folds in clinical trials.

Not an actual patient.
